31 May 1967 <u>g/</u>	845,625	15,326	311,466	1,172,417	40,019	25,297	106,843	1,344,576

- a/ The above statistics are based on the Agency's registration records, which do not necessarily reflect the actual refugee population owing to factors such as unreported deaths and undetected false registration.
- b/ Before 1954 half rations were issued to babies and bedouin as well as to frontier villagers in Jordan. Since then babies have been eligible for full rations after their first anniversary if the ration ceiling permits. Bedouin are eligible to receive full rations. Half rations are issued only to frontier villagers in Jordan.
- c/ Includes babies below one year of age and children, including some above the age of 15 years, who because of ration ceilings are not issued rations (221,035 in Jordan, 34,934 in Gaza, 23,217 in Syria and 5,118 in Lebanon at 31 May 1967).
- d/ Columns 5, 6 and 7 show the number of persons whose registration for assistance by the Agency has been reduced or cancelled according to their family income as known to the Agency and the income scale in force in their country of residence.

The members of "R" families receiving no rations (column 5) shown for 1957 to 1967 correspond to a level of income insufficient to cancel the whole family's entitlement to rations. Up to 1956, such persons were reported together with families of the "N" category (column 7). In 1966 a new sub-category of registration was introduced for persons registered for rations but whose entitlement has been temporarily suspended (e.g. by reason of their employment by the Agency, or placed in institutions). At the end of May 1967 persons registered in this sub-category numbered 10,713.

The "S" category of registration (column 6) was created in January 1965 in place of the previous "E" and "M" categories and is being extended to all the, host countries in accordance with appropriate income scales.

"N" category (column 7) includes refugees whose income is such as to disqualify them for rations or normal services or who have received assistance to enable them to become self-supporting.

In general, it must be pointed out that the distribution of refugees by category of registration gives only a partial picture of the number of self-supporting refugees owing to the limitations faced by the Agency in determining their actual income or degree of need.

- e/ The total population as at 30 June 1952 included 19,616 refugees receiving relief in Israel who were the Agency's responsibility to that date.
- f/ Details not available.
- g/ Changes in June 1967 and position at 30 June 1967 not yet available because of the hostilities.

This table recapitulates changes over seventeen years affecting the total number of ration recipients, their babies and children registered for services (column 4 of table 1). Births, new registrations, deaths, false registrations and duplications result in additions to or deletions from the registration records. Self-support and absence reflect transfers to or from the lower categories of registration (shown in columns 5, 6 and 7 of table 1).

Transfers within or between host countries, as well as issue of rations (when available) to children registered for services are not shown in this table.

Includes changes effected during the 1950-1951 census operation.

Covers income, employment with the Agency, assistance towards self-support, etc., or the cessation thereof.

Miscellaneous changes include up to June 1953 a number of additions to or deletions from the registration records as well as certain changes in category of registration. The deletion of refugees in Israel from the Agency's records is also reported mainly under this heading (40,930 persons over the period July 1950 - June 1953).

Changes during June 1967 not yet available because of the hostilities.

This table recapitulates changes affecting the total number of registered population (column 8 of table 1) over seventeen years. Transfers within or between host countries are not shown herein.

In comparing the figures in this table with those in table 3 it should be borne in mind that deletions from the ration rolls do not necessarily entail deletions from the total registered

population. Persons ceasing to draw rations because of absence or self-support continue to be registered within the total population. On the other hand some deaths and false and duplicate registrations are reported among persons registered but not receiving rations, and this accounts for the minor differences under those headings in the two tables. In the earlier years of the Agency's history the distinction between ration recipients and registered population was incompletely recorded.

Nature of changes reported under Miscellaneous was not specified during the census operation. Figures reflect those amendments which resulted in addition or deletion in the total registered population, and removal of refugees in Israel from UNRWA registration records,

Changes during June not yet available because of the hostilities.
