Overl

All figures related to programme response are planned and not actual figures. The final project response depends on funding levels. Programme response figures were collected by the FSS in parallel to the HRP process at the end of 2015. Food insecurity and resilience data is drawn from the SEFSec survey 2014. Population projections are provided for 2016 by PCBS. Unemployment and wage data are were also collected by PCBS for 2014.

Map shading and classes are based on Palestine overall (West Bank and Gaza Strip), thus some classes may appear empty. Further, to improve graphical representation, classes are not always equidistant. The grey circles in the legend refer to the size of the coloured pie charts in the respective map

WEST BANK

Humanitarian Programme Cycle 2016 FSS Humanitarian Response Plan

FOOD S Strengthenin

How to use this:

This matrix is meant as tool to improve coordination between organizations working in food security in Palestine. Each table represents one governorate. For every governorate it is shown which partners (columns) are active in which working field/activity type (rows). Thus each organisation can quickly look up which other organisations are active in the same field in the same governorate. Partners active in the governorate are highlighted. The numbers indicate the amount of projects per partner in the working field in the respective governorate. The "All" field summarizes the activities for all partners per activity type in the governorate.

Additional Explanations:

Data used in this matrix was collected by the FSS in parallel to the HRP process at the end of 2015. It was directly submitted by the partners. All projects are planned projects, actual implementation depends on funding levels.

Please turn around for more information on food security and socio-economic background data, as well as budget and beneficiary distribution.
