

Number 5 September 2006

The humanitarian situation in the West Bank and Gaza Strip continued to deteriorate in 2006. The primary causes of this deterioration were Israeli access and security restrictions and the military incursions together with the Palestinian Authority (PA) fiscal crisis (freezing of the VAT and donors' cutting off of assistance) following the election of the Hamas movement in the Palestinian Legislative Council (PLC) elections.

The deteriorating situation led UN agencies and NGOs participating in the 2006 emergency Appeal to produce a monthly report to monitor changes according to key humanitarian indicators in the following sectors: health, child protection and psychosocial support, education, food security, agriculture, water and sanitation and job creation and cash assistance.

This report uses a combination of measurable humanitarian indicators and verified field observations. These two data collection methods can provide different accounts of the situation. The humanitarian indicators reveal longer-term changes and trends from one month to another. Field observations show early signs of strain that may indicate future changes in the situation more generally.

Under the Fourth Geneva Convention, Israel as the occupying power bears the responsibility for the welfare of the Palestinian population. In recent years, international donors and the PA have in practical terms taken on this role. The Government of Israel (GoI) is also under an obligation to transfer VAT taxes and customs duties that it collects on behalf of the PA under the Paris Protocol (1994) which amounts to roughly US\$60 million per month or roughly 50% of PA revenues. The GoI has withheld these VAT and customs transfers since the PLC elections in January. The Paris Protocol was reaffirmed as continuing to apply as recently as the 15 November 2005 Agreement on Movement and Access (AMA) between the GoI and PA.

The following UN Agencies and NGOs provide information to the Humanitarian Monitor: United Nations Children's Fund (UNICEF), United Nations Development Program (UNDP), United Nations Educational Scientific and Cultural Organization (UNESCO), United Nations Food and Agricultural Organization (FAO), United Nations Office for the Coordination of Humanitarian Affairs (OCHA), United Nations Population Fund (UNFPA), United Nations Relief and Works Agency for Palestinian Refugees in the Near East (UNRWA), United Nations Special Coordinator for the Middle East Peace Process (UNSCO), Oxfam (GB), Palestine Hydrology Group, World Food Program (WFP) and World Health Organization (WHO).

## **Situation Analysis:**

A war-like situation between the IDF and Palestinian militants continued in the Gaza Strip with the population locked down and a limited volume of goods trickling in and out of the area. Although less than in August, 24 Palestinians were killed and 84 were inured in the Gaza Strip this month (a further 7 Palestinians were killed and 112 injured in the West Bank). At the same time, one Israeli was killed and 24 were injured. Internal violence intensified, with 13 Palestinians killed in the Gaza Strip in September.

In the West Bank, the comprehensive enforcement of the strike by PA employees in protest over the non-payment of salaries since March 2006 cut Palestinian access to essential services. Most of the public services, including health and education, were disrupted. The strike, while lasting throughout September in the West Bank ended after several days in the Gaza Strip. The strike added to the strain already on the PA's capacity to deliver services since the freezing of international assistance and Israel's withholding of Palestinian VAT transfers. UN agencies and NGOs in the health sector are concerned about the effect of a weakening PA health system on the general health of the population.

On 21 September, the Quartet issued noted in a statement: that "the resumption of transfers of tax and customs revenues collected by Israel on behalf of the Palestinian Authority would have a significant impact on the economy".

### **Summary Humanitarian Indicators:**

Due to the ongoing PA employees strike, not all information was available for this edition of the Humanitarian Monitor, especially with regard to the West Bank.

### Protection and access

• In total, 31 Palestinians were killed during the ongoing conflict with Israel in the oPt compared with 76 in August. The number of Palestinians injured (196) decreased since August (266). Twenty-four Israelis were injured.

- Palestinian internal violence intensified with 13 Palestinians killed and 73 injured in the Gaza Strip, compared to 12 killed and 55 injured the previous month.
- One in five Palestinians killed are children this month ten of the Palestinians killed were children, and a further 28 were injured.
- 389 children were held in detention by Israel, a 30% increase on the 2005 monthly average.

# The Humanitarian Monitor

occupied Palestinian territory

- Palestinian workers and traders from the Gaza Strip have not been allowed into Israel since 12 March. In the West Bank, Palestinian workers and traders with valid entry permits were prohibited from entering East Jerusalem and Israel on three days in September.
- The number of physical obstacles restricting Palestinian movement in the West Bank decreased from 547 in August to 514 in September. The IDF removed redundant earth mounds after the construction of road barriers and fencing along the major restricted roads, and as such, this reduction does not signal improved Palestinian access.
- The Israeli military destroyed 37 Palestinian homes and structures during incursions, air strikes and shelling.

## **Health**

- 26% of essential drugs remained out of stock in the West Bank and 19% in the Gaza Strip.
- The prevalence of anaemia in pregnant women remained high at 46.1% in the Gaza Strip (39.8% in August).
- The incidence of watery and bloody diarrhea in children between the ages of 0 – 3 years attending Gaza's UNRWA health facilities was higher than during the same month in 2005 (+28%) but decreased since last month due to seasonal factors and improved access to electricity and water.

### **Education**

• Since 2 September, 90% of the MoEHE staff is on strike in the West Bank. In the Gaza Strip, a five-day strike halted following an agreement with the Teachers' Union.

### Food security

- No milk powder was available in the Gaza Strip in September. Given the electricity supply problems in the Gaza Strip, it is likely that fresh milk is also not widely available.
- Food prices have fluctuated, increasing by 1% Gaza Strip and 0.5% in the West Bank.
- Fishermen have ventured out to catch sardines despite the IDF ban imposed on 25 June. The IDF destroyed several boats and killed one fisherman that tried to fish.

#### **Field Observations:**

### Delivery of services / capacity of service-providers

### Absenteeism and disrupted work practices:

A strike conducted by the PA employees started on 23
 August in protest against the non-payment of salaries, and
 spread rapidly. Since 14 September, PA introduced the twoday weekend for all PA staff.

- Birth and deaths registrations, marriage certificates issuance, passports and driving license renewal were affected.
- Most PA hospital staff in the West Bank worked according to reduced hours and most services have been suspended at PHCs. Chemotherapy and drugs for chronic illnesses were still provided.
- A partial strike at MoH hospitals in the Gaza Strip lasted three days (5-7 September) 3 hours per day and there was a two-week comprehensive strike at Kamal Adwan hospital (5-21 September).
- In the Gaza Strip teachers striked between 2 September (the start of the new school year) and 9 September. In the West Bank, 90% of PA teachers have been on strike.

### Payment of salaries and allowances:

- The PA provided a partial payment of NIS 1,500 (\$33) to employees in late September. With this payment, PA employees earning less than NIS 1,500 (\$333) have received the equivalent of four months salary since March 2006; employees with a NIS 1,500-2,500 (\$333 and 556) salary have received two months salary; and employees with a salary over NIS 2,500 (\$550) have received one and a half month's salary.
- Private West Bank Palestinian companies (e.g. Padico and Paltel) distributed food coupons worth NIS 500 (\$111) to low-income PA employees and the families of detainees.
- As of 30 September 2006, the TIM Window III has disbursed approximately \$44 million to low-income PA employees (mostly teachers and health workers), pensioners and social hardship cases. The TIM will be extended for another three months and is likely to assist a wider group of PA employees.

## Health:

- West Bank MoH hospitals and clinics have been on strike for six consecutive weeks severely undermining health care provision. Most wards were closed, except the intensive care, coronary, oncology and haemodialysis units. Emergency rooms receive only critical cases. Maternity wards suspended services on 19 September: With the exception of caesareans, women have delivered babies in low-cost ill-equipped private clinics.
- UNRWA started vaccinating non-refugees. MoH clinics provide vaccines every two weeks (normally it is daily).

### Fuel, electricity and water:

 A new emergency pool was dug to prevent sewage overflow in Gaza's Beit Lahia Waste Water Treatment Plant.

# The Humanitarian Monitor

- Seven transformers for the Gaza Power Plant have been donated by the Arab League, two pf which arrived on 22 September. All transformers will be installed in late November. Rafah city has been connected to the Egyptian electricity network, providing electricity around the clock. The IDF destroyed the Gaza Power Point on 28 June.
- In September, the TIM provided 922,426 litres of fuel to health, water, waste management facilities and to GEDCO electricity company.

### Socio-economic conditions

- Canteens at UNRWA schools reported a considerable drop in sales at the beginning of the new school year.
   Students' pocket money has decreased from NIS 1 to NIS 0.5 (\$0.22 to 0.11).
- Bedouins of Khan Al Ahmar community, between Jerusalem and Jericho governorates, have reduced their livestock sevenfold due to lack of access to markets and the recent drought. Bedouins in Jericho governorate generally, are increasingly unable to afford water.

#### Security

- On 20 September, the IDF raided 24 banks and money exchange shops in the West Bank cities of Ramallah, Nablus, Tulkarm, and Jenin, confiscating computers and money.
- Masked Palestinian men set fire to churches in Tulkarm, Nablus city, Jenin and Tubas, reportedly in response to comments made by the Pope Benedict XVI regarding Islam.

#### Access

 Various age restrictions (18-25 years, 16-30 years and 16-35 years) on Palestinian men travelling south through Zaatara checkpoint have created chaos and long queues leaving Nablus.

# NGO and UN capacity to respond to increased demand for assistance

- The PA strike has meant that World Food Programme cannot distribute food via its PA counterparts.
- PA employee refugees are receiving emergency food rations from UNRWA.
- In Ramallah governorate, wives of PA employees frequently approach UNRWA schools for jobs.
- In southern West Bank, UNRWA schools are turning down increasing numbers of requests from refugees for admission in the new school year due to lack of classroom capacity and inadequate paperwork from students.

### **End Notes**

### Protection of civilians and access

Source: OCHA, Weekly Briefing Notes

The figures reported are 'direct conflict related casualties' and do not include casualties indirectly related to the conflict such as incidents involving unexploded ordinances, traffic accidents between Israelis and Palestinians in the oPt, deaths after medical access was denied at checkpoints or during curfews/military operations. The figures also do not include causalities when the circumstances remain unclear or are in dispute. In August, an additional nine Palestinians were killed and 13 injured in indirect conflict related incidents.

Source: OCHA, Weekly Briefing Notes

Source: Ministry of Labour, closure reports. These figures include weekends i.e. Saturdays, when they fall within a comprehensive closure period.

Source: OCHA. The following categories of Palestinians were exempted from this general closure: (I) workers from international organisations; (2) medical staff; (3) humanitarian cases; and (4) Palestinians with legal issues i.e. needing to attend court in Israel

Source: UN, Implementation of the Agreement on Movement and Access biweekly report. OCHA compiles several times a year a comprehensive count of physical obstacles to Palestinian movement in the West Bank. The figures reported in this document are based on OCHA field observations only.

### Job creation and cash assistance

- Source: PCBS, Quarterly Labour Force Survey. In the context of protracted crisis, the standard unemployment definition can be deficient as a considerable number of people are no longer seeking employment. A 'relaxed definition' of unemployment is calculated by adding the total number of unemployed people according to ILO standards and the number of people no longer engaged in active job search.
- According to PCBS, the improvement can be attributed to the emergency unemployment programme conducted by the MoL and also school and university students have joined the labour market during their summer holiday.
- \* Source: *PCBS, Labour Force Survey.* The indicator was designed according to ILO standards and refers to all persons aged 15 and above who during the reference week (i) were in paid employment or self-employment for at least one hour, or (ii) did not work, but held a job from which they were temporarily absent. Numbers include both West Bank ID holders and Palestinians with Israeli ID.
- According to PCBS, less than 1,000 Palestinians from the Gaza Strip were employed in Israel and settlements during the last quarter of 2005. The exact number is not available for the reporting period.
- Source: *Palestinian National Security Forces.* 2000 data obtained from UNSCO. The average daily labour movement is calculated excluding weekends i.e. Fridays and Saturdays except when they fall over a comprehensive closure period.
- Source: *IUED, Palestinian Public Perceptions Polls No. 3, 9 and 10.* IUED objective poverty measure is based on the reported household income, taking into account the number of adults and children in the household. Poverty rates for the West Bank include East Jerusalem. The poverty line is calculated using the PCBS poverty line of 2,216 NIS for 2006 for a family of six (two adults and four children) per month. Since 2001, UN agencies in the oPt have funded the IUED to conduct a poll on Palestinian perceptions of their living conditions. This data can be used to analyse changes in the situation over time and is one of the few sources of currently available information on the situation in 2006. PCBS projections estimate that in Q2 2006, 67% of households would be in poverty, according to income based definitions (Poverty in the Palestinian Territories, 2005).

### Health

- Source: Central Drug Store, Ministry of Health. Drugs 'out of stock' refers to stock levels of less than one month's requirement for 416 items.
- Source: Primary Health Care Directorate, West Bank and Gaza Strip, Ministry of Health Nutrition Department. Two different methods are used in the West Bank and the Gaza Strip to measure underweight. The 5<sup>th</sup> percentile is being used in the West Bank as a cut off point while the -2 standard deviation is used since June 06 in the Gaza Strip. Both data are collected at clinic level and may not give a representative picture of the nutritional situation. Rather, they can serve as an early indicator of a change/deterioration in the nutritional situation.
- xviii Source: PCBS/DHS (2004)
- Source: Primary Health Care Directorate, West Bank and Gaza Strip, Ministry of Health Mother and Child Health Department. This indicator can be interpreted the same way as the percentage of children underweight.
- \*\* Source: UNRWA Epidemiology Department, West Bank and Gaza Strip Field Offices. An increase in consultations for diarrhea is related to increased poor quality of water, which suggests that environmental health programmes run by the Ministry of Health and Municipalities are not coping with the need, specifically in water and sanitation programmes. Monthly figures are compared to the corresponding month in the previous year due to seasonal diarrhea trends.
- Source: Hospital Directorate, West Bank and Gaza Strip. The number of cesarean births is used to measure the extra load on maternity wards, assuming the number of beds and personnel is constant.

# Child protection and psychosocial support
