OFFICE OF THE UNITED NATIONS SPECIAL CO-ORDINATOR

SOCIO-ECONOMIC REPORT – MARCH 2008

Since 1996 UNSCO has continually monitored and reported on socio-economic conditions in the occupied Palestinian territory and in the process established an extensive socio-economic database. UNSCO does not create raw data but rather uses available data which, in the occupied Palestinian territory is relatively abundant. However, the data that is available tends to remain dispersed and is not always automatically shared between institutions. The objective of the database is to bring together in one place a wide variety of data on socio-economic conditions and by doing so present a broader, more detailed perspective on socio-economic conditions. The purpose of this report is to: 1) broaden the access to this database through publication of the most recent data gathered; and 2) provide readers with up to date information on socio-economic conditions in the occupied Palestinian territory.

The report is divided into three sections:

Section 1 consists of a one-page fact sheet which provides a snapshot view of the socioeconomic situation of the current and previous reporting period and for reference purposes provides base line figures for the period just prior to the outbreak of the second *Intifada*.

Section 2 and 3 report on the Macro-economic and the Private sector and banking modules of the UNSCO database. They provide data on the last six reporting periods for each indicator as well as base line data. In addition, some initial analysis on observed trends is given below each table.

¹ For a more detailed report on sections C (Macro-economy) and D (Private sector), see data below.

² CPI Base year 1996 = 100

³ MoNE data does not include aggregates or aid flows.

⁴ Adjusted unemployment is calculated by adding discouraged workers (i.e. unemployed but no longer seeking work) to the ILO

standard.

Standard.

Effective closure days are calculated by adding all days when a crossing was fully or partially closed excluding weekend and holidays.

MACRO-ECONOMIC UPDATE - MARCH 2008

- Exchange rate
- Consumer Index by region and expenditure group
- Truck Movement
- Palestinian Imports and Exports
- Volume of registered fuel sales
- Palestinian Trade with Israel

For further information please contact:

Ramallah: Bushra Mukbil mukbil@un.org
Gaza Strip: Raed Rageb raqeb@un.org

Indicator	Baseline Aug-00	Oct-07	Nov-07	Dec-07	Jan-08	Feb-08	Mar-08
Exchange Rate							
	4.05	4.04	0.00	0.00	0.70	0.50	0.50
Exchange Rate	4.05	4.01	3.92	3.88	3.78	3.59	3.56
Source: PCBS							

The US\$-NIS exchange rate dropped very slightly in March, 2008 making imports more affordable.

Indicator	Baseline Aug-00	Oct-07	Nov-07	Dec-07	Jan-08	Feb-08	Mar-08			
Volume of Registered Fuel sales in the Gaza Strip (x 1000 liters/ton)										
volume of registered fuel sales in the Gaza Strip										
Benzene 95 (Liter)	878.3	1,122.1	1,154.5	1,232.2	650.0	283.5	343.0			
	878.3 2,310.6	1,122.1 264.1	1,154.5 0.0	1,232.2 0.0	650.0 0.0	283.5 0.0	343.0 0.0			
Benzene 95 (Liter)		,	,	, -						
Benzene 95 (Liter) Benzene 96 (Liter)	2,310.6	264.1	0.0	0.0	0.0	0.0	0.0			

Registered fuel sales in the Gaza Strip have slightly increased in March, except for White Gasoline (kerosene) which dropped to zero. Overall, registered fuel sales have markedly dropped since the beginning of 2008 due to the significant decline in fuel supplies to Gaza, negatively affecting economic activity in Gaza.

The Palestinian CPI continued its steady increase in the month of March 2008. This increase is primarily due to the situation in Gaza, where the CPI has increased by 3.59%, when compared to the CPI in February. During the month of March food prices increased in the Gaza strip by 6%, reaching higher levels than those in Ramallah and in Hebron where traditionally prices are higher. Prices for textiles, clothing and footwear have increased by approximately 3%.

Truck movement to Gaza has been restricted to the import of humanitarian supplies since 12 June 2007. Exports were suspended at the same time with only approximately 78 truckloads of strawberries and flowers grown with the support of the Netherlands exported in December. Compared with February, when Kerem Shalom was closed, the passage of imported truckloads increased in March by 45.5% with 24 effective working days at Kerem Shalom. In addition, Karni was closed 14.5 days in February, and 9.5 in March.

The closure of Gaza crossings is having negative economic consequences for Israel as well. The Israel-oPt trade balance - which had reached almost half a billion per quarter in the early part of 2007 - has dropped significantly in the past two quarters. Since the first quarter of 2007, the balance of trade dropped by 15 percent primarily as a result of declining imports from Israel into the oPt. A second notable finding is that despite the suspension of exports from Gaza, total oPt exports to Israel remained at the same level as during previous quarters indicating an increase in exports from the West Bank.

The number of new company registrations is used as a proxy indicator for the vitality of the local economy as well as the ability of the local economy to create new employment. New company registrations in the West Bank increased in March 2008 by approximately 9.1%. However, if compared to pre-Intifada levels new company registrations has dropped by approximately 52.4%. In Gaza, new company registrations remained at its all-time low of zero.

Similar to new company registrations, the area licensed for new construction is also used as a proxy indicator for economic vitality. If compared with February, areas licensed for new construction increased in March by 18%. However, if compared with pre-Intifada levels, areas licensed for new constructions have significantly dropped, by approximately 53.3%.

Data on bank credit is used as a proxy indicator for perceptions of economic progress (increasing use of bank credit, particularly in the main productive sectors) or decline (decreasing use of bank credit). The Palestine Monetary Authority provides adjusted monthly data once per every three months. The last six months of 2007 show a distinct decline in the use of bank credit, a trend that is particularly evident during Q4-2007 in the main productive sectors (manufacturing, construction, general trade). In contrast, the use of bank credit increased by over 32 percent in the financial services sector, most likely as a preventative effort by banks to stave off potential implications of severed relations with Israeli banks. Bank credit to the public sector has more than tripled if compared with the pre-*Intifada* period.

Disaggregating bank credit by the type of credit, confirms the relative stability of the banking sector. The ability of the PA to resume regular salary payments will have had some impact in the decrease of loans.

Disaggregating bank credit by the borrowing entity shows that consumer lending has declined significantly in the third quarter of 2007 and has continued to drop in the fourth quarter. The most likely reason for this development is the continued risk-adverse stance of Palestinian banks combined with the recommencement of regular payment of PA salaries which has allowed a number of PA staff to pay off existing loans reducing the demand for credit.

Bank deposit data for the fourth quarter indicates a continued sizeable increase in private sector deposits (both in terms of public and private sector bank deposits). Compared with January 2007, bank deposits in December 2007 show an increase of 18.3 percent.

Indicator	Baseline Jun-00	Sep-06	Dec-06	Mar-07	Jun -07	Sep -07	Dec -07		
Value of Loans and Deposits (x million US\$)									
Total Loans	1,234	1,891	1,903	1,916	1,902	1,829	1,758		
Total Deposits Loans/Deposits (ratio)	3,328 37.06%	4,514 41.89 %	4,657 40.87%	4,876.6 39.29%	4,997 38.06%	5,420 33.75%	5,702 30.84%		
Source: PMA	37.06%	41.89%	40.87%	39.29%	38.06%	33./5%	30.84%		

In an efficient economy, an increase in the loans versus deposits ratio is a positive sign as monies are not saved but invested or consumed, stimulating the economy. Since September 2006, this ratio has steadily declined in the oPt (by over 26 percent) signaling little optimism concerning the Palestinian economy which limits appetite for domestic investment and thus increases deposits. The sharp drop in the third and fourth quarter signals heightened concern with regard to overall economic performance, most likely due to the events in Gaza since June 2007.

Similar to bank credit and deposits, data on the Palestinian stock exchange is used as a proxy indicator of Palestinian perceptions vis-à-vis the state of the national economy. The data for March 2008 shows an increase in trade at the stock exchange both in terms of value and number of stocks traded. The Al-Quds index has grown in March, by approximately 8.5%.
